# FLOOD INSURANCE

CAN BE THE DIFFERENCE BETWEEN  
**RECOVERY** & **FINANCIAL DEVASTATION**

Photograph by Adam Dubrowa

*Did you know that just three inches of floodwater inside your home will likely require the replacement of drywall, baseboards, carpets, and furniture?* If you don't have flood insurance, your out-of-pocket cost (based on a 1500 square foot, one floor home) is estimated to be about \$15,000. For six inches of water, that estimated loss rises to approximately \$23,000.

The deeper the floodwater, the more it will cost. Floodwaters deeper than eighteen inches could mean repairs to your electrical system as well as the heating and cooling systems. It also means you'll likely be replacing doors, appliances and cabinetry. Which means the estimated cost can rise well over \$30,000 for repairs.

No home is completely safe from potential flooding. Click to view this Vero Beach TV episode of [\*The Floods of Hazard hosted by Denise Boehning with our own Markus Mueller and Chuck Gerrald\*](#) offering a wealth of comprehensive information that you don't want to miss!

If you live in a high-risk area, flood insurance can be the difference between recovery and financial devastation. Knowing you can recover because you have the right protection in place brings peace of mind.

Rosa is here to take your call, so you don't have to spend most of your time either pressing buttons or shouting "Yes" and "No" at the phone. Rosa enjoys working with the entire staff and speaking with clients to meet their needs. Outside of work you'll find Rosa in the kitchen cooking up a favorite meal, enjoying her favorite characters from a much-loved book, or simply soaking up the sunshine in her kayak.
